

LARGE-FORMAT AUTOMATIC CUTTING MACHINE

VELOCITY

PROCUT XL

 STATIC

Extra-large automated cutting
for high-volume manufacturing.

62" × 12' to 82" × 26'

WORKING AREAS

5 tools

CUTTING & MARKING

24 zones

VACUUM HOLD-DOWN

01 – OVERVIEW

Precision that supports productivity.

The Velocity ProCut XL is the extra-large member of the ProCut family, built for manufacturers who need bigger working areas for long markers, large pattern pieces, and high-volume production.

The ProCut XL Static features a stable fixed table with an industrial grey felt surface, in working areas from 62" x 12' up to 82" x 26'. Material is loaded and unloaded manually, offering a lower initial investment.

WORKING AREAS: 62" x 12' TO 82" x 26'

Custom dimensions available upon request.

02 – ENGINEERING & PERFORMANCE

01	Advanced Servo Motor Technology	Precision-controlled servo motors deliver accurate tool positioning and consistent machine movement throughout the cutting process.
02	Precision Gear & Pinion Drive System	Engineered for controlled movement, reliable positioning, and repeatable cutting performance.
03	Industrial Static Cutting Table	A stable, fixed-table configuration provides a dependable cutting platform for professional manufacturing applications.
04	Zoned Vacuum Hold-Down	24 independently controlled vacuum zones, selected manually or automatically, keep material stable across the full table, with suction strength managed automatically.
05	Integrated Safety Technology	Infrared safety protection and an anti-collision system are designed to support safer machine operation.

03 – TOOLING

Five professional cutting & marking tools.

An interchangeable knife configuration lets operators select the appropriate cutting method based on material characteristics and production requirements.

01 – WHEEL KNIFE

Active Circular Knife

High-speed cutting tool that delivers excellent edge quality. Ideal for breathable fabrics without requiring an underlay, and minimizes damage to felt-type materials.

APPLICABLE MATERIALS

Textile fabrics, microfiber cloth, specialty fabrics, cambric, corduroy, flannel, gauze, 100% cotton, organic cotton, Pima/Supima cotton, cotton-poly blends, and similar materials.

02 – 8 MM STROKE

Oscillating Knife

Electric oscillating tool with an 8 mm stroke, designed for cutting textile fabrics and thicker materials that require higher cutting force.

APPLICABLE MATERIALS

Multi-layer textiles (up to 2 plies), canvas, suede, wool, poplin, denim, and thicker materials, depending on thickness.

03 – DCT

Drag Knife

Designed for low-to-medium strength materials up to approximately 6 mm thick. Adjustable pressure, stable performance, high cutting speed, flexibility, and simplified maintenance.

APPLICABLE MATERIALS

Integrated pattern pieces, textile fabrics, microfiber cloth, specialty fabrics, cambric, corduroy, flannel, gauze, cotton varieties, and blended materials.

04 – MARKING MODULE

Pen Holder

Compatible with various markers and pen refills for production marking and annotation.

APPLICATIONS

Fabric or paper marking, notches, style information, annotations, and reference indicators.

05 – PATTERN NOTCHES

Notching Tool

Dedicated notching tool that produces accurate pattern alignment notches as part of the cutting job, so cut pieces arrive at sewing ready to match and assemble.

APPLICATIONS

Pattern alignment notches, seam-allowance and balance marks, center points, and matching references for sewing and assembly.

04 – MACHINE CONTROL

Intelligent cutting control.

INCLUDED SOFTWARE

SCC/MCC Controlling Center Software

The Velocity ProCut XL includes dedicated machine-control software designed to manage cutting operations and support production workflows.

KEY SOFTWARE CAPABILITIES

-  Machine operation and configuration
-  Cutting-job management
-  Cutting-tool control
-  Production workflow management
-  Operating parameter adjustments

05 – PRODUCTION ADVANTAGES

Engineered to improve your manufacturing workflow.

Precision & Repeatability

Support consistent cutting results through advanced motion-control technology.

Versatile Manufacturing Applications

Accommodate different cutting requirements through multiple cutting and marking tools.

Operator Control

Dedicated machine-control software provides centralized management of cutting operations.

Production Efficiency

Reduce repetitive manual cutting tasks and streamline suitable cutting operations.

Material Stability

Vacuum-assisted material holding helps minimize unwanted movement during cutting.

Production Consistency

Automated tool positioning helps maintain repeatable cutting processes across production jobs.

06 – SPECIFICATIONS

Industrial technical specifications.

SPECIFICATION	PROCUT XL
MACHINE TYPE	Large-Format Static Cutting System
WORKING AREA	62" × 12' up to 82" × 26'
DRIVE SYSTEM	Precision Gear & Pinion
MOTOR TECHNOLOGY	Advanced Servo Motors
CUTTING SYSTEM	Multi-Tool Configuration
MATERIAL HOLD-DOWN	24 Independent Vacuum Zones
VACUUM PUMP	9.0 kW (62" × 12' model) · varies by size
CUTTING SURFACE	Industrial Grey Felt
MATERIAL FEEDING	Manual Loading & Unloading
MACHINE CONTROL	SCC/MCC Software
SAFETY	Infrared & Anti-Collision Protection

ELECTRICAL REQUIREMENTS · 62" × 12' MODEL

CUTTING MACHINE 1.85 kW 220 V	VACUUM SUCTION PUMP 9.0 kW 380 V	AIR COMPRESSOR 1.0 kW 220 V
---	--	---------------------------------------

Requirements vary by model. Electrical phase, frequency, and installation requirements must be confirmed before installation.

07 - DIMENSIONS

Standard Cutting Area Dimensions

08 – THE VELOCITY ADVANTAGE

More than a cutting machine. A complete manufacturing solution.

At Velocity Plotters & Cutters, we believe that industrial equipment should be supported by professional installation, comprehensive operator training, and dependable technical assistance. Our commitment extends beyond equipment delivery.

Onsite

INSTALLATION & TRAINING

Professional machine setup, operational configuration, software installation, cutting-tool preparation, and hands-on operator training.

2 years

PARTS WARRANTY

Extended protection for qualifying replacement parts, subject to applicable warranty terms.

8 months

TECHNICAL SUPPORT

Telephone, remote-access, video-conferencing, and qualifying onsite support, separate from the initial installation and training program.

Complete equipment package

- ProCut XL cutting machine
- Vacuum suction system
- SCC/MCC control software
- Replacement blades
- Five cutting & marking tools
- Air compressor
- Safety protection systems
- Additional spare parts

No mandatory service contract

Customers are not required to purchase a separate service agreement. Optional continuing support arrangements are available.

Take your cutting operations to the next level.

Talk with our team to find the right format and table size for your materials and production volume. Custom dimensions are available upon request.
